

DYNATECH USER GUIDE

DynaTech is an Artificial Intelligence powered educational chatbot that was created using Botpress. Its design follows a user-friendly format to help users understand Artificial Intelligence (AI) topics in a structured interactive conversation format. This educational chatbot simplifies complex concepts in AI.

- DynaTech offers an easy-to-use chatbot for everyone.
- Whether you are a tech wizard or are new to tech concepts, DynaTech is the best
- DynaTech helps to simplify complex Artificial Intelligence topics for the user

To begin using DynaTech:

Step 1 – Click on the public link to access the chatbot - [DynaTech](#)

DYNATECH USER GUIDE

Step 2 – Click on “Ask me anything about AI, Machine learning, or how it works”

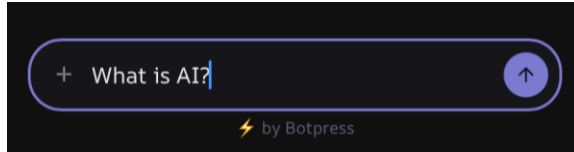

Step 3 – Now you can start asking any questions you have about AI concepts.

DynaTech will respond with the relevant information based on your question

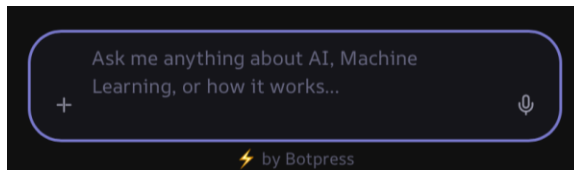

Ways to interact with DynaTech

DynaTech supports two main interaction models

- Text-based questions

- Voice recorded questions

Key Features

DynaTech uses a guided conversation flow by Botpress to guide the user step by step

- Definition - Application - Challenges
- Step by step explanations
- Structured topic progression
- DynaTech can be asked follow-up questions, for example “explain more”
- DynaTech remembers the current topic for logical engagement with the user
- Further learning links may be recommended by DynaTech
- The user can ask DynaTech for a quiz to test their knowledge

Tips for Best Use

- Ask clear and simple questions on AI
- Ask follow up questions for better understanding

Error Handling

- If DynaTech does not understand your question, try asking in a clear manner that focuses on Artificial Intelligence.
- Ask simple straightforward questions based on AI concepts and not the weather.
